

Gravity Scooter

Enjoy an exhilarating downhill ride on our purpose built Gravity Scooters! These stable and safe scooters have front suspension and disk brakes, and look like a downhill mountain bike, but anyone with good biking skills can participate. Combining mountain scenery and an exciting descent, this evening tour fits perfectly with your daytime excursions.

Good to know

- Downhill Scooters are easier to ride than downhill bikes
- Good biking skills are necessary
- Scooters have front suspension and disk brakes
- The trip begins in Lauterbrunnen where we take a cable car to Grütschalp. From Grütschalp you get panoramic views of the Jungfrau mountain
- The trip begins with a gentle section along the mountainside before descending down to Lauterbrunnen
- The descent to Lauterbrunnen takes around 1 hour
